- **Industrial project for Biofertilizer production**
- **Our 1L Twin Bioreactor**

A/S "Biotehniskais centrs" ir noslēdzis 21.04.206 līgumu Nr. SKV-L-2016/94 ar Latvijas Investīciju un attīstības aģentūru par atbalsta saņemšanu pasākuma "Starptautiskās konkurētspējas veicināšana" ietvaros, ko līdzfinansē Eiropas Reģionālās attīstības fonds.

A/S "Biotechnikais centrs" has concluded 21.04.206 contract no. SKV-L-2016/94 with the Investment and Development Agency of Latvia for receiving support within the framework of the "Promotion of International Competitiveness" measure, which is co-financed by the European Regional Development Fund.

Bioreactors.net at Achema 2022

We are pleased to announce that we will be exhibiting at ACHEMA 2022 from the 22nd until the 26th of August in Frankfurt. We will be set up in Hall 4.1, stand H53, so feel free to come by and have a chat!

If you are interested in coming to the event, let us know and we will send you a free invitation. We hope to see you there!

Industrial project for Biofertilizer production

In 2016, Bioreactors.net installed two industrial bioreactor production lines for the manufacture of biofertilizers in Lithuania.

Biofertilizers are biological products containing living microorganisms used to revitalize the soil.

The first line consists of three bioreactors of different sizes:

- One 50L bioreactor
- One 500L bioreactor
- One 5 000L bioreactor

The second line also contains three bioreactors of the same scales as the first line, but also an additional 20 000L bioreactor.

The 1L twin Bioreactor

The EDF-1.2 is a robust, laboratory bioreactor that contains 2 vessels with a capacity of 1 litre each, allowing the user to conduct 2 parallel or separate fermentations simultaneously.

For temperature control, the EDF-1.2 makes use of Peltier elements so there is no need to connect a cooling water source, while still enabling the system to achieve a temperature range from 10-50°C without a hitch.
